

PRACTITIONER STATEMENT

My Art piece is a collage that symbolises certain things about myself and of what I admire in life. I decided to draw up the piece with a 4H graphite pencil, and then use watercolour to give my art piece more of a smooth texture.

The main design elements and principals that I feel are of significance in this art piece are; emphasis, it has a composition that makes you look at points of interest in the work and captures the viewers attention, proportion, it shows different scales of size to give it more of a quirky look and form because some drawings are three-dimensional, which encloses more volume to certain pictures.

My main intention in creating this art piece was to show there is more to a person than what you see on the outside. Everyone has their own identity because no one is the same. Sometimes people just don't have the opportunity to express their true self. I wanted the viewers to learn something that they didn't know about me, just by looking at my drawn collage.

My personal assessment of this work that didn't think I would be able to accomplish something like this. Designing this main piece was enjoyable because it was all about myself and there was no wrong answer. I'm glad I went out of my comfort zone and tried a new style of art. I'm proud of what I did and the overall look of my major piece.
